1| tokens in program element name with sub-tokens
1| tf/idf weights of node types
1| syntax change type
1| source code tokens weighted based on node centralities
1| nearest enclosing method/function scope
1| most similar known entry from knowledge base
1| program element name
1| sequence of edits made to ast
1| log message
1| aggregated node features
1| bounding boxes of nodes in image of rendered graph
1| bytecode instructions corresponding to code
1| code author
1| changed source code tokens
1| compiler error line number
1| compiler error message
2| domain specific expert features
2| software metrics
2| description of code to be generated
3| tokens in program element name
4| code comment
4| sequence of rules used to generate ast
4| source code with sub-tokens
5| positional information of tokens/program elements
7| bug report
9| code summary or query
48| source code
